Projects

1. SkillSwap – Freelance Micro-Task Platform

[Live Link](#) | [GitHub \(Client\)](#) | [GitHub \(Server\)](#)

Description: A role-based freelance marketplace where clients hire freelancers through Stripe payments and admins manage the platform.

Tech Stack: Next.js | Better Auth | Tailwind CSS | Node.js | Express.js | MongoDB | Stripe

Key Features:

- Role-Based Dashboards – Separate dashboards for Clients, Freelancers and Admins, allowing each user to access features and tools based on their role.
- Task Hiring Workflow – Clients can post tasks, review freelancer proposals, hire freelancers through secure Stripe payments while freelancers can track proposals and active projects. After the work is completed, clients can rate and review freelancers.
- Admin Management – Admins can manage users by blocking or unblocking accounts, monitor all tasks, remove inappropriate listings and view platform transaction history.

2. DriveFleet Car Rental Platform

[Live Link](#) | [GitHub \(Client\)](#) | [GitHub \(Server\)](#)

Description: A modern and responsive full-stack car rental platform that allows users to explore available vehicles, view detailed information, book cars and manage their own listings through a personalized dashboard.

Tech Stack: Next.js | Better Auth | Tailwind CSS | Node.js | Express.js | MongoDB

Key Features:

- Car Discovery & Search – Users can browse available cars, search by name and filter by vehicle type to quickly find the right car for their needs.
- Car Booking System – Users can book cars with additional options such as hiring a driver and adding special notes, creating a smooth rental experience.
- Personal Dashboard – Users can manage their bookings, view rented vehicles and update or remove their own car listings from a dedicated dashboard.

3. Tiles Gallery

[Live Link](#) | [GitHub](#)

Description: A responsive tile showcase platform where users can browse collections, search products and manage their profiles.

Tech Stack: Next.js | Better Auth | Tailwind CSS | MongoDB

Key Features:

- Browse & Search Tiles – Explore tile collections and quickly find products with built-in search.
- User Authentication – Secure email and Google sign-in with protected routes.
- Profile Management – Update profile information and access personalized features.
